NextFirst Engineering

Jan 2020 – May 2020 | Bangalore, India

🧠 SOFT SKILLS

Teamwork | Problem Solver

Project Management | Positive Attitude

📁 PROJECTS

Online Trip Management System [🔗](#)

Providing Back-End support to trip management application by creating REST API's to perform CRUD operations in the database

GitHub [🔗](#)

Features

- The modules are signup, login, packages, hotel, booking, travel, report and feedback.
- Admin and customer authentication from clients and accessing respective APIs.

Tech Stack

Java | SpringBoot | Hibernate | MySQL

Area of Responsibility

- Built the hotel and feedback management module.
- The APIs created in the hotel module are adding a hotel in a package, updating a hotel and deleting a hotel from the package.
- In the feedback module, a user can add feedback, and an admin can view all the feedback received.

Skin Store Clone [🔗](#)

Skin is one of the leading fashion product brands and we made a clone of its online retail platform. This was a group project of 5 members and was completed in a week.

GitHub [🔗](#) Deployment [🔗](#)

Features

- End-to-End product purchasing flow on the website.
- Home page with various sections
- Detailed product information page

Tech Stack

CSS | HTML | JavaScript

Area of Responsibility

- Built the Sign-Up and Login page with Authentication
- Developed flow from products page to cart page.
- Fully functional cart page with the capability of managing quantities.
